

Summative Assessment Diagnostic Imaging Report Diagnostic Imaging

Candidate Name:	Date:
Imaging Study/Procedure:	

Rate the Following*:	Above Expectation	Meets Expectation	Below Expectation	Not Applicable
Is there correct use of medical terminology?				
Is there accurate quantification (measurement/angles/ratios)?				
When given, is the clinical question identified and recorded?				
Are the quality and limitations of the current study suggested?				
Is the report clear and easy to read?				
Is there comparison with previous studies if available?				
Is the report well organized?				
Is the differential diagnosis clear?				
Are the observations described in a logical manner?				
Does the report answer the clinical questions?				
Is diagnostic confidence stated if in doubt?				
Where appropriate, is there a conclusion?				
Is further investigation/intervention/follow-up suggested if appropriate and if so, with clear purpose?				
Where appropriate, is adequate response to treatment given?				

^{*} Adapted from the Bristol Radiology Report Assessment Tool (BRRAT)

Please elaborate on any items marked Below Expectation. Might any of these cause a patient safety concern?
