## Applications

Question	Response
<p>We are wondering whether the committee would look favorably upon two groups putting in a joint application or whether it would be preferable to put in two separate applications since the topics are related but different.</p>	<p>The deadline for Expression of Intent was 4 p.m. MST on Dec. 15, 2022.</p> <p>If both organizations submitted an expression of intent prior to the deadline, then each organization should submit a separate application for the different topics.</p> <p>If any of the parties did not submit an expression of intent prior to the deadline, then the organization would not be eligible to submit a grant application.</p>
<p>I am seeking some clarity about whether a joint application between two organizations working together on shared outcomes would be preferable to each organization submitting a separate project. We noted that the guidelines encourage partnerships but wanted to be sure that it was appropriate to unite our projects within a single grant application.</p>	<p>The Expression of Intent deadline was 4 p.m. MST on Dec. 15, 2022.</p> <p>If both organizations submitted an expression of intent prior to the deadline, then a joint application for the same project can be submitted.</p>
<p>You've mentioned not to contact anyone at CPSA about this grant, but because CPSA would be one of the organizations that would be the most effective in distributing/integrating/adopting in our primary target Albertan segment. How do we go about this in the application? Is this even allowed?</p>	<p>The degree of collaboration could outline collaborating relationships that are already established, or they will be established through the completion of the project.</p>

We have planned a collaborative study with clinics in Alberta and another province; if we are successful, all funds from CPSA would remain in AB (we can make this clear in the budget). Our partners in another province are participating because of the scientific value of the study and any costs they have will be met through their resources. Would any of this be an issue for qualifying the grant? Should we solely focus on the part of the study that will occur in AB or may we describe the study in its entirety?

All projects should be described in their entirety.

---

Is it possible to list a number of projects under one application? Or should the projects be submitted under different applications?

The Expression of Intent deadline was 4 p.m. MST on Dec. 15, 2022. You must submit a separate expression of intent for each project before the deadline.
