

Are you a **FAMILY DOCTOR or ENDOCRINOLOGIST** that takes care of **thyroid cancer patients on thyroid hormone replacement therapy** (e.g., Synthroid, Cytomel, Desiccated Thyroid)?

We would love to hear from you!

Dr. Sana Ghaznavi, a Clinical Researcher in the Division of Endocrinology and Metabolism, and her team at the University of Calgary are conducting a 2-part research study on quality of life in post-thyroidectomy patients.

**In this phase, we are surveying doctors to hear about their experience managing post-thyroidectomy patients on thyroid hormone replacement.** Separately, we are surveying patients about their experience of being managed on thyroid hormone replacement therapy by their doctors.

We want to learn whether you use synthroid alone or combination therapies, how you deal with persistent hypothyroidism symptoms, and ways you incorporate labs and patient symptoms into your treatment plan.

Please consider completing the brief (< 10 min) physician survey by clicking the link below or scanning the QR code:
